on the Vincent Dyke. —

On the Venereal Disease.

✓ Dr. Dorr's lectures upon this Disease will  
add likewise to <sup>your</sup> knowledge of its symp-  
-toms & cure.

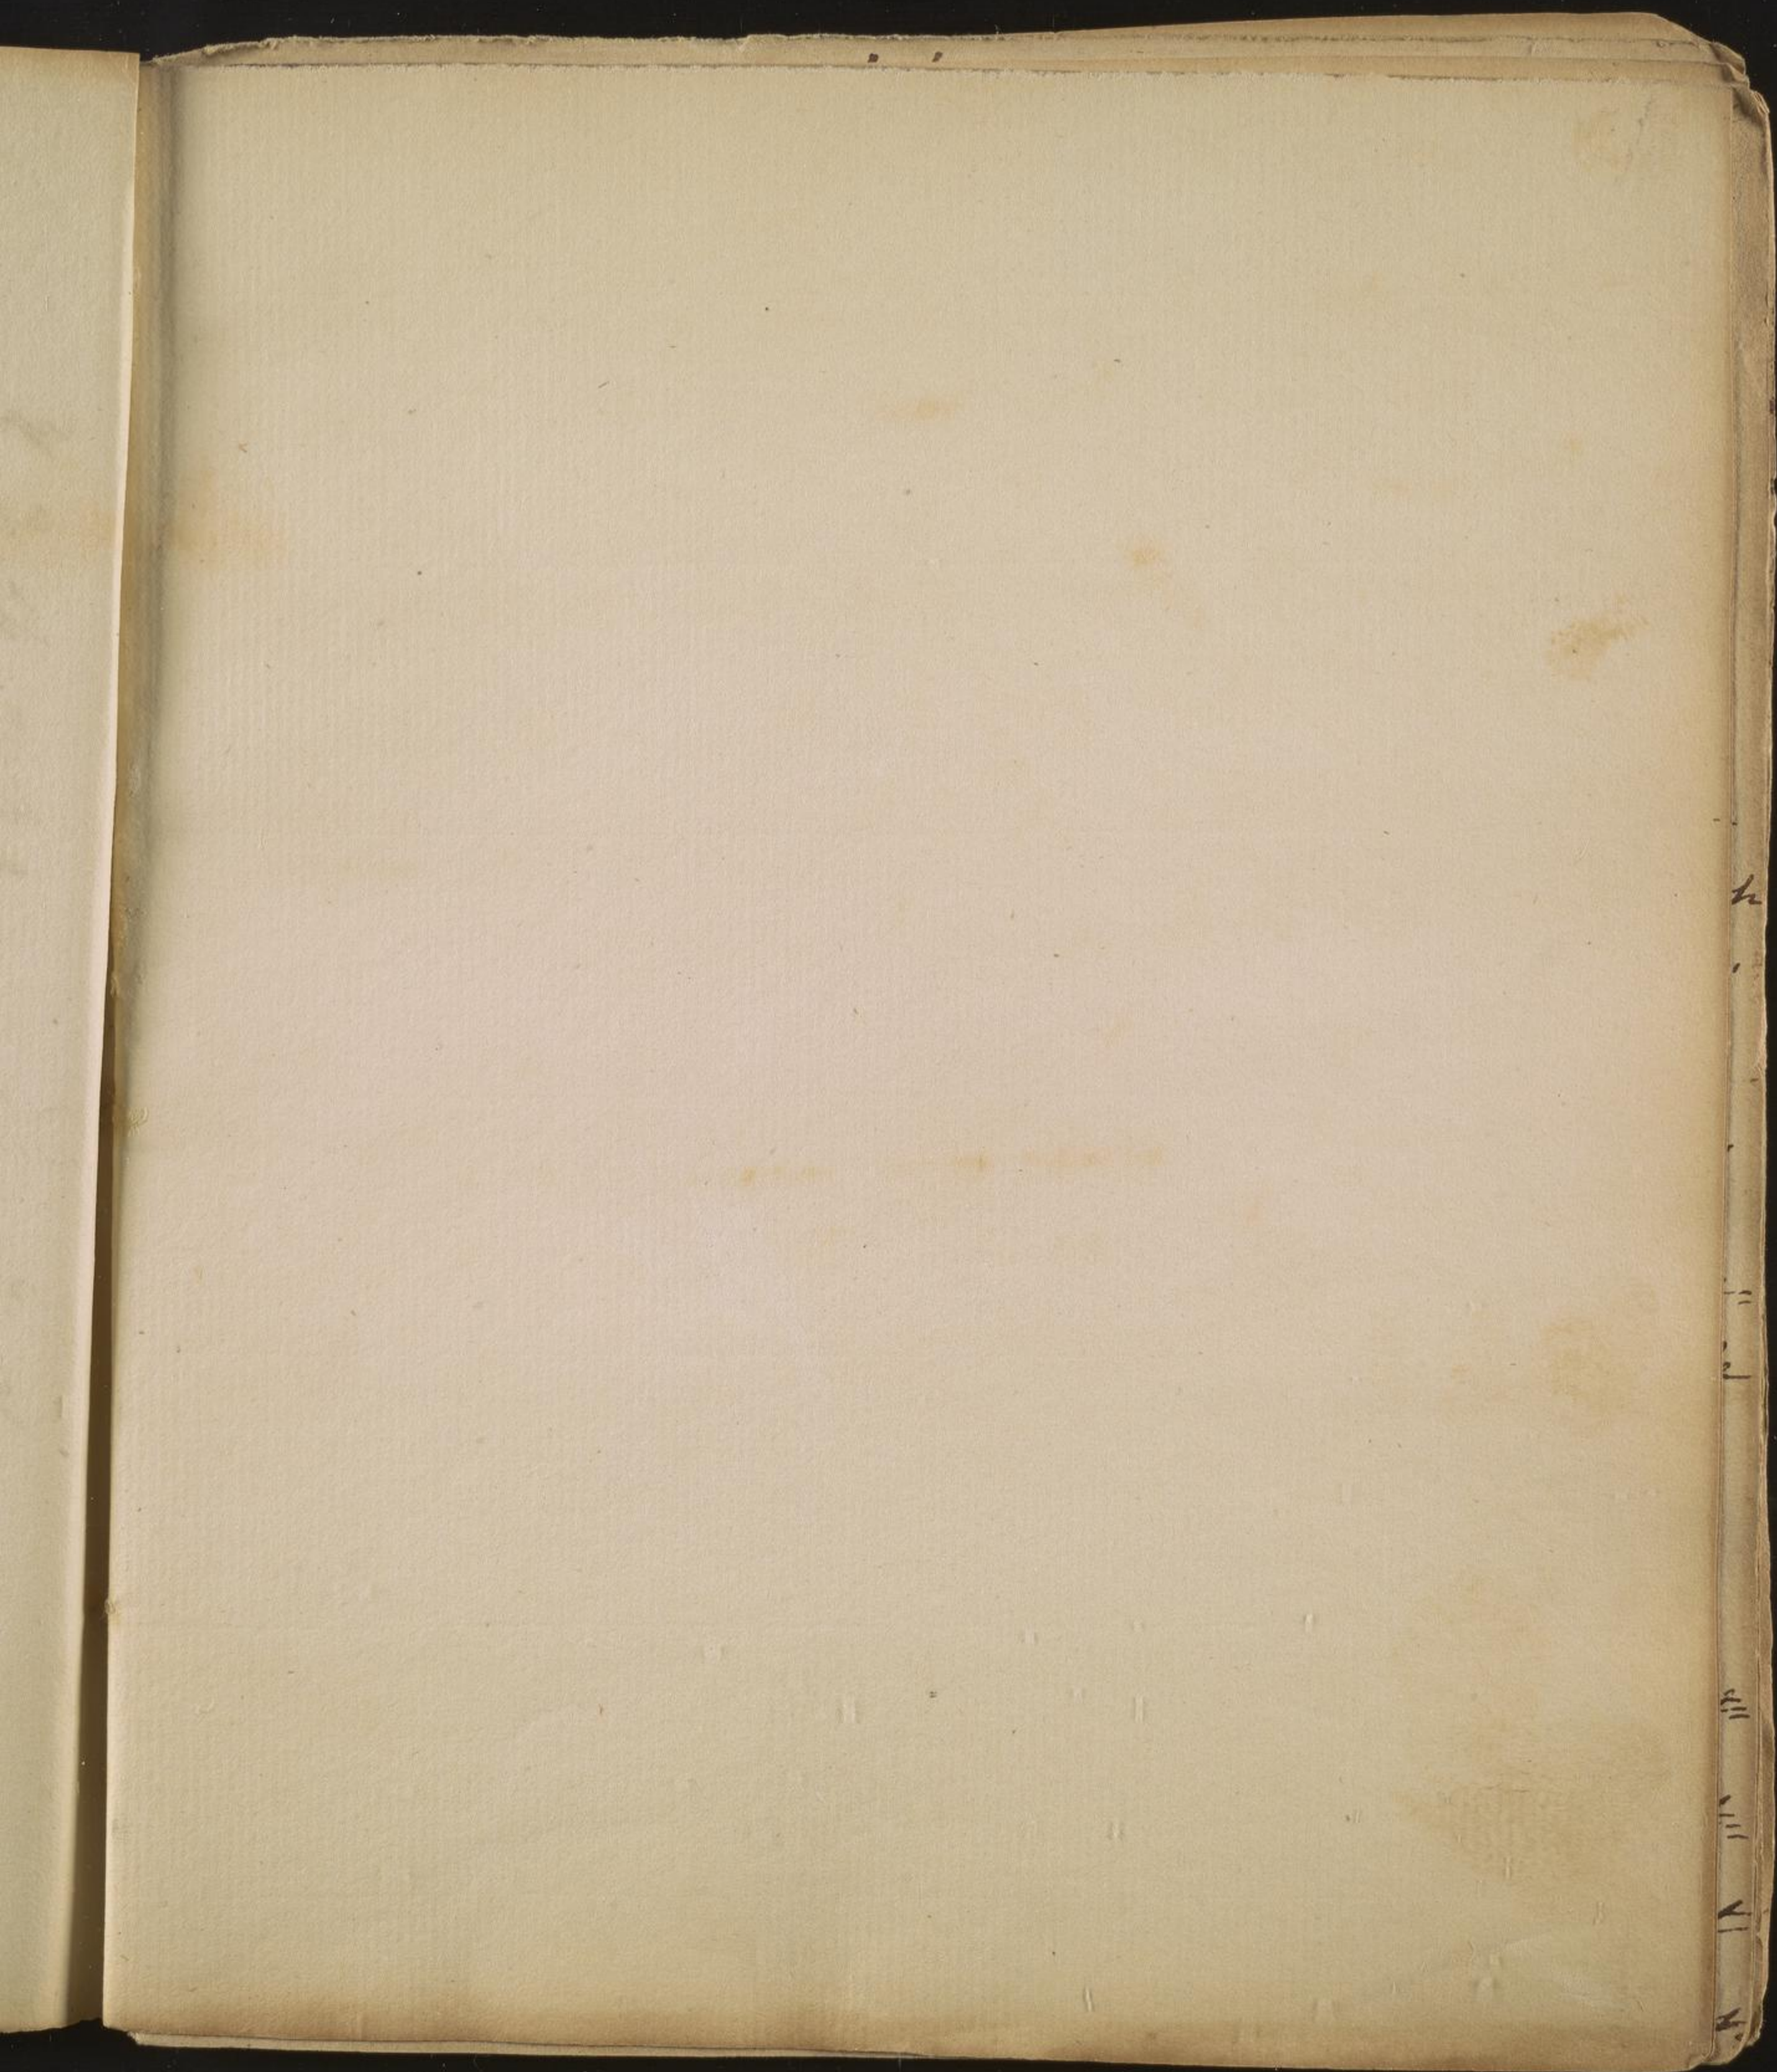

On the Venereal Disease.

There are so many practicable books  
upon this disease, that which contain nearly  
all that is known of its symptoms & cure  
that I shall not detain you by retailing  
them to you. I shall only deliver to you  
~~those~~ <sup>such</sup> opinions that have been the result  
of my reflections, & such facts as have  
the result of my observations upon it. ~~Dr  
Dunham's lectures will~~  
I shall ~~begin by~~ introduce my  
remarks upon this disease by a quotation  
from the benevolent Dr Dunham.

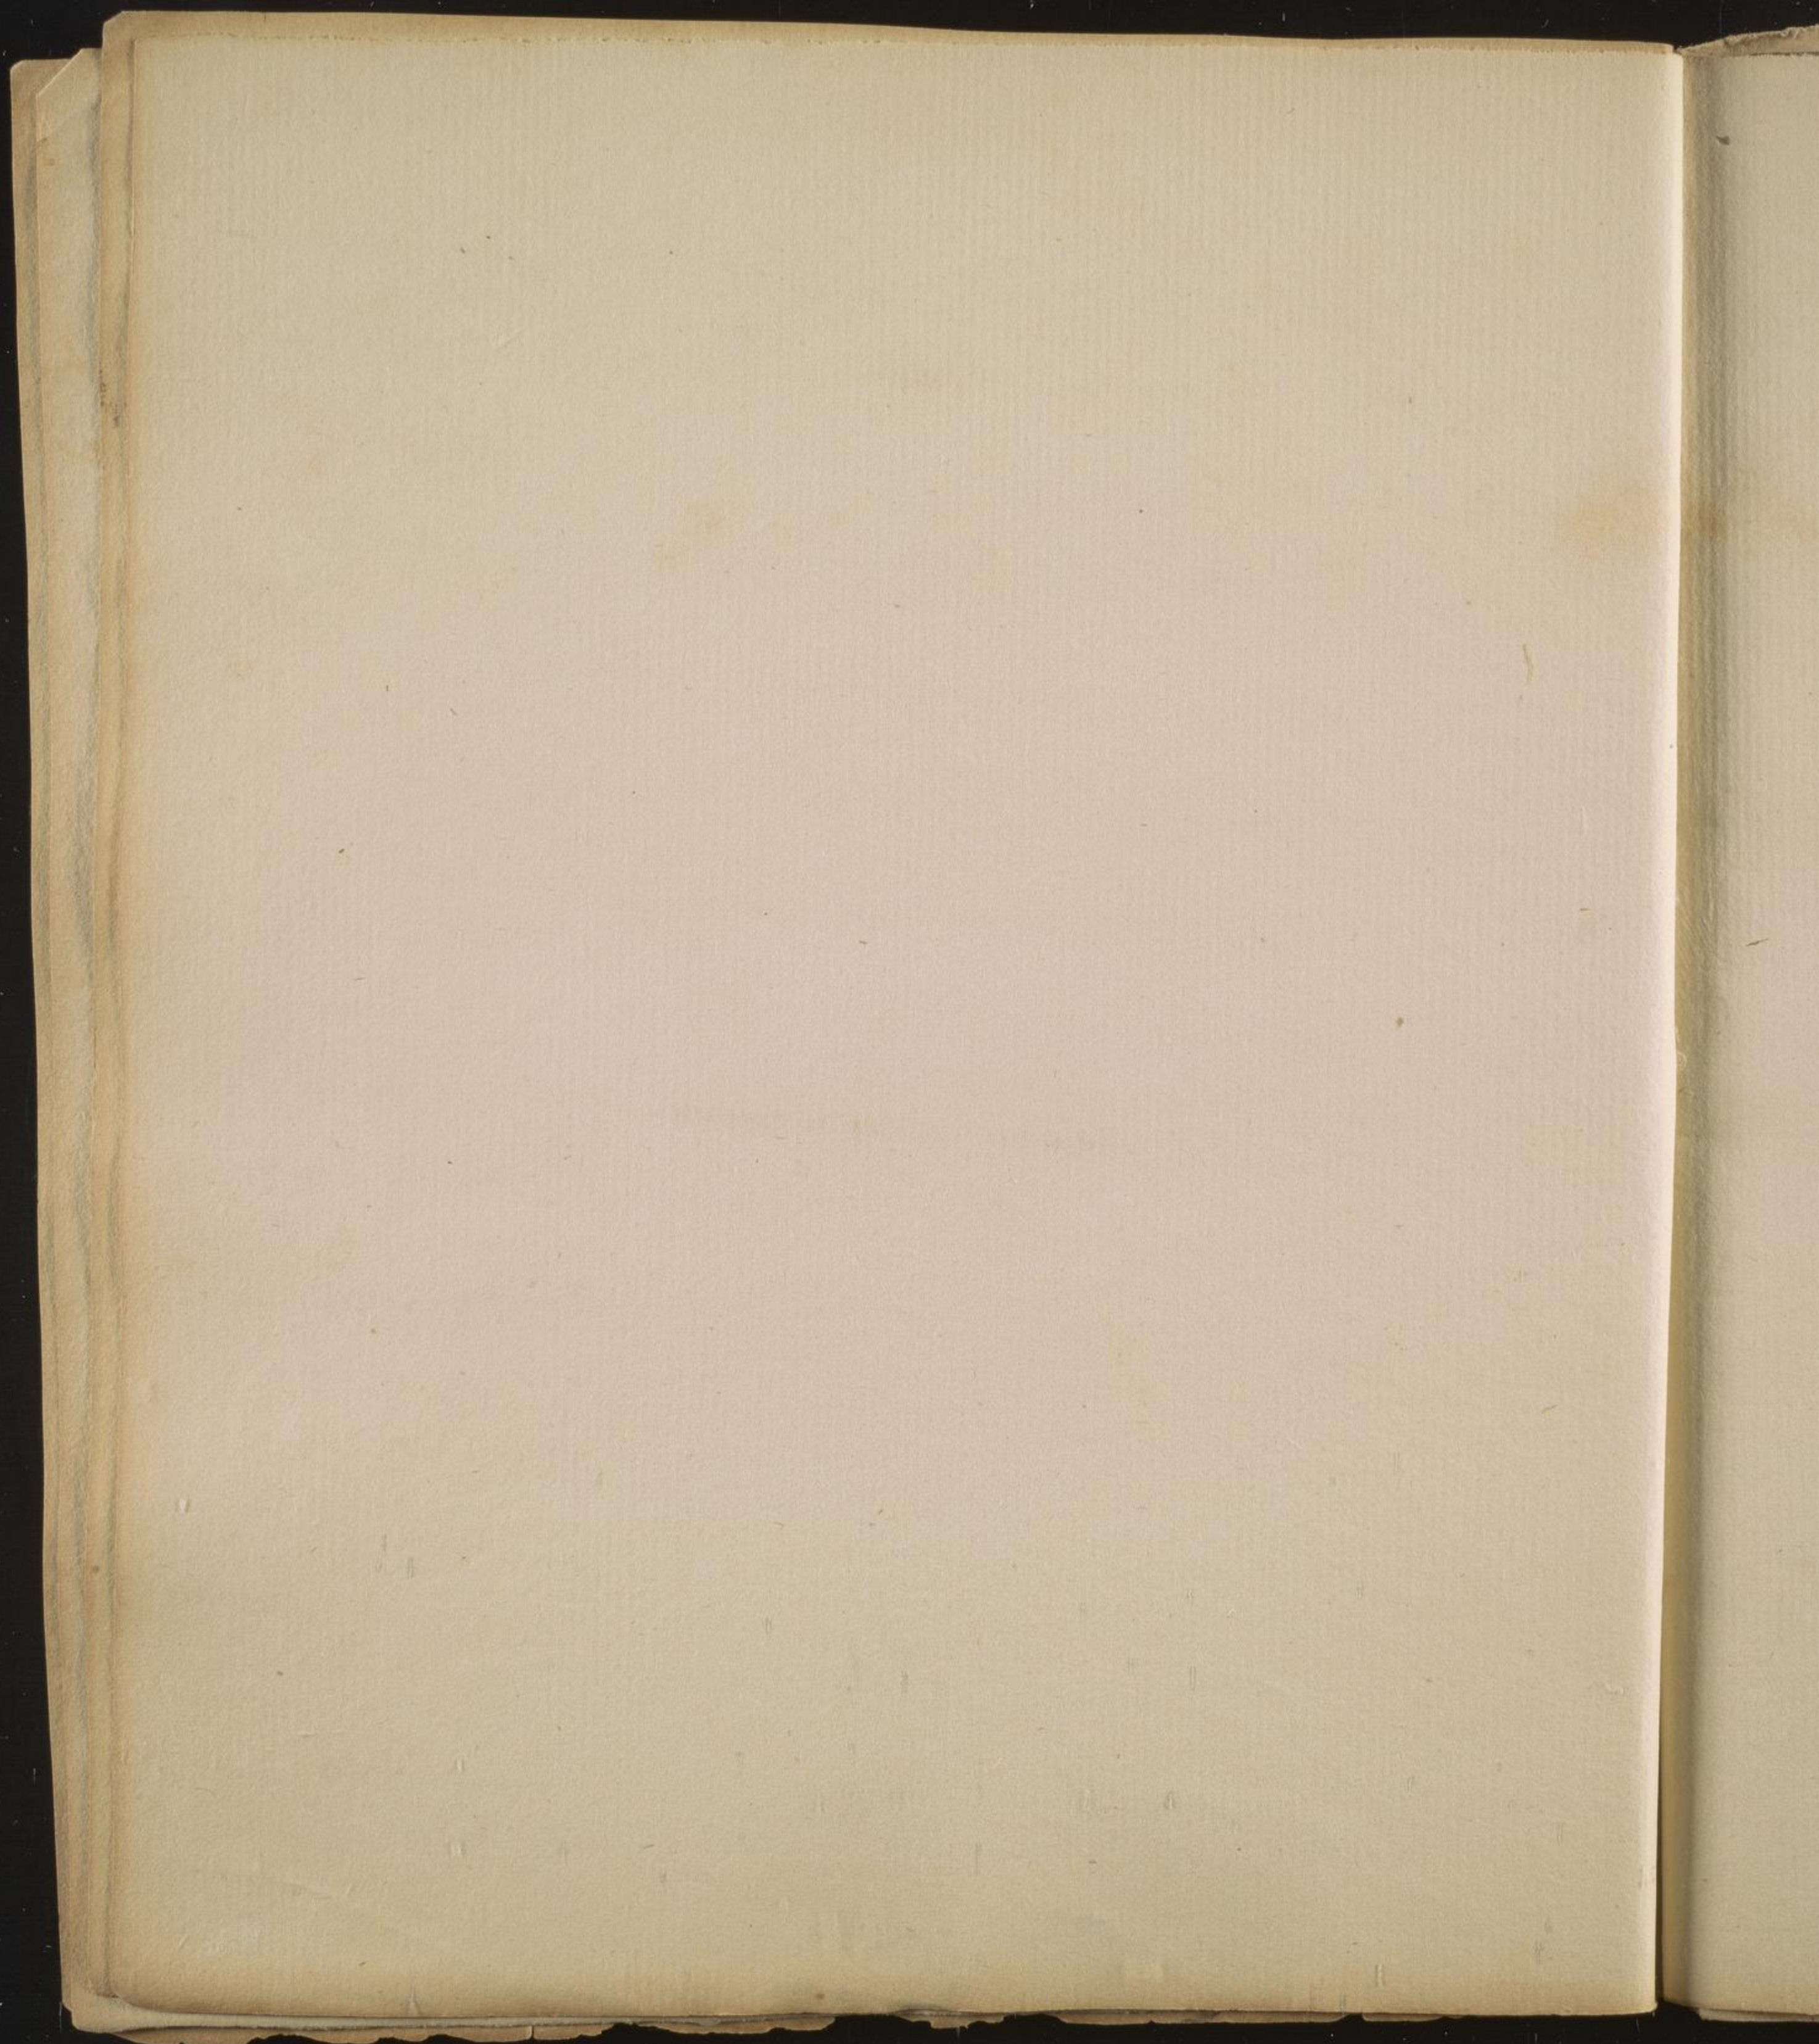

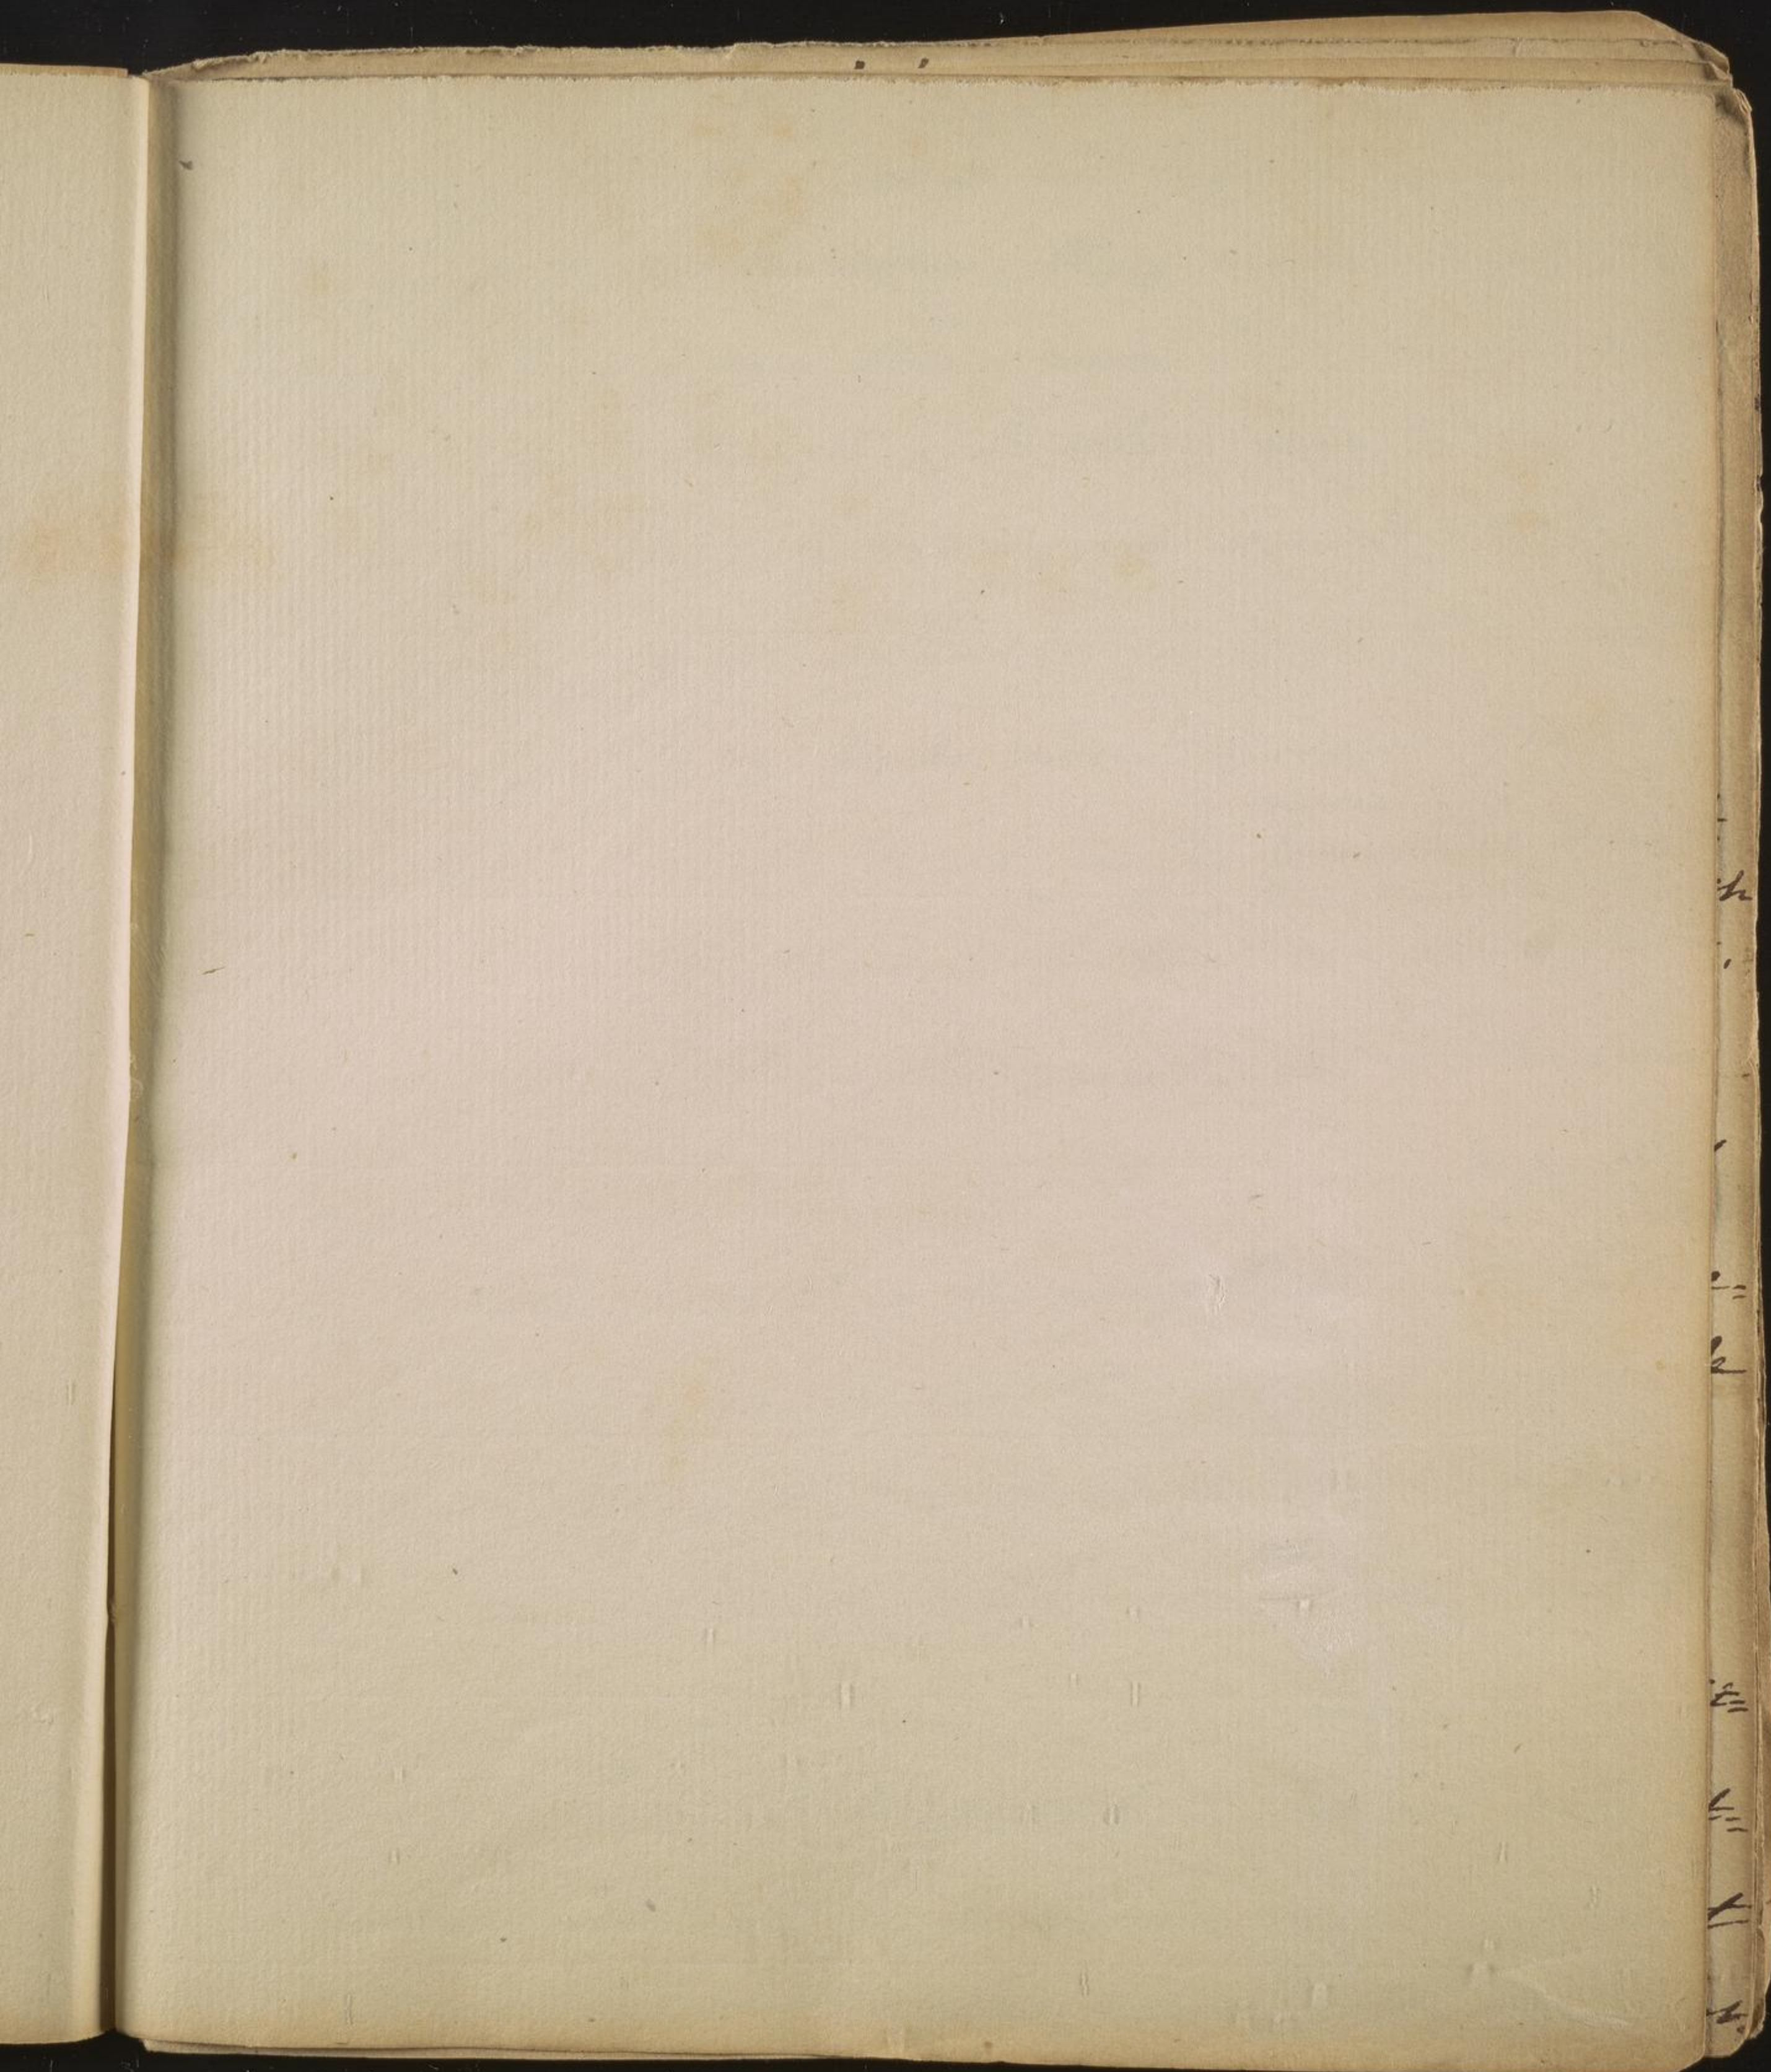

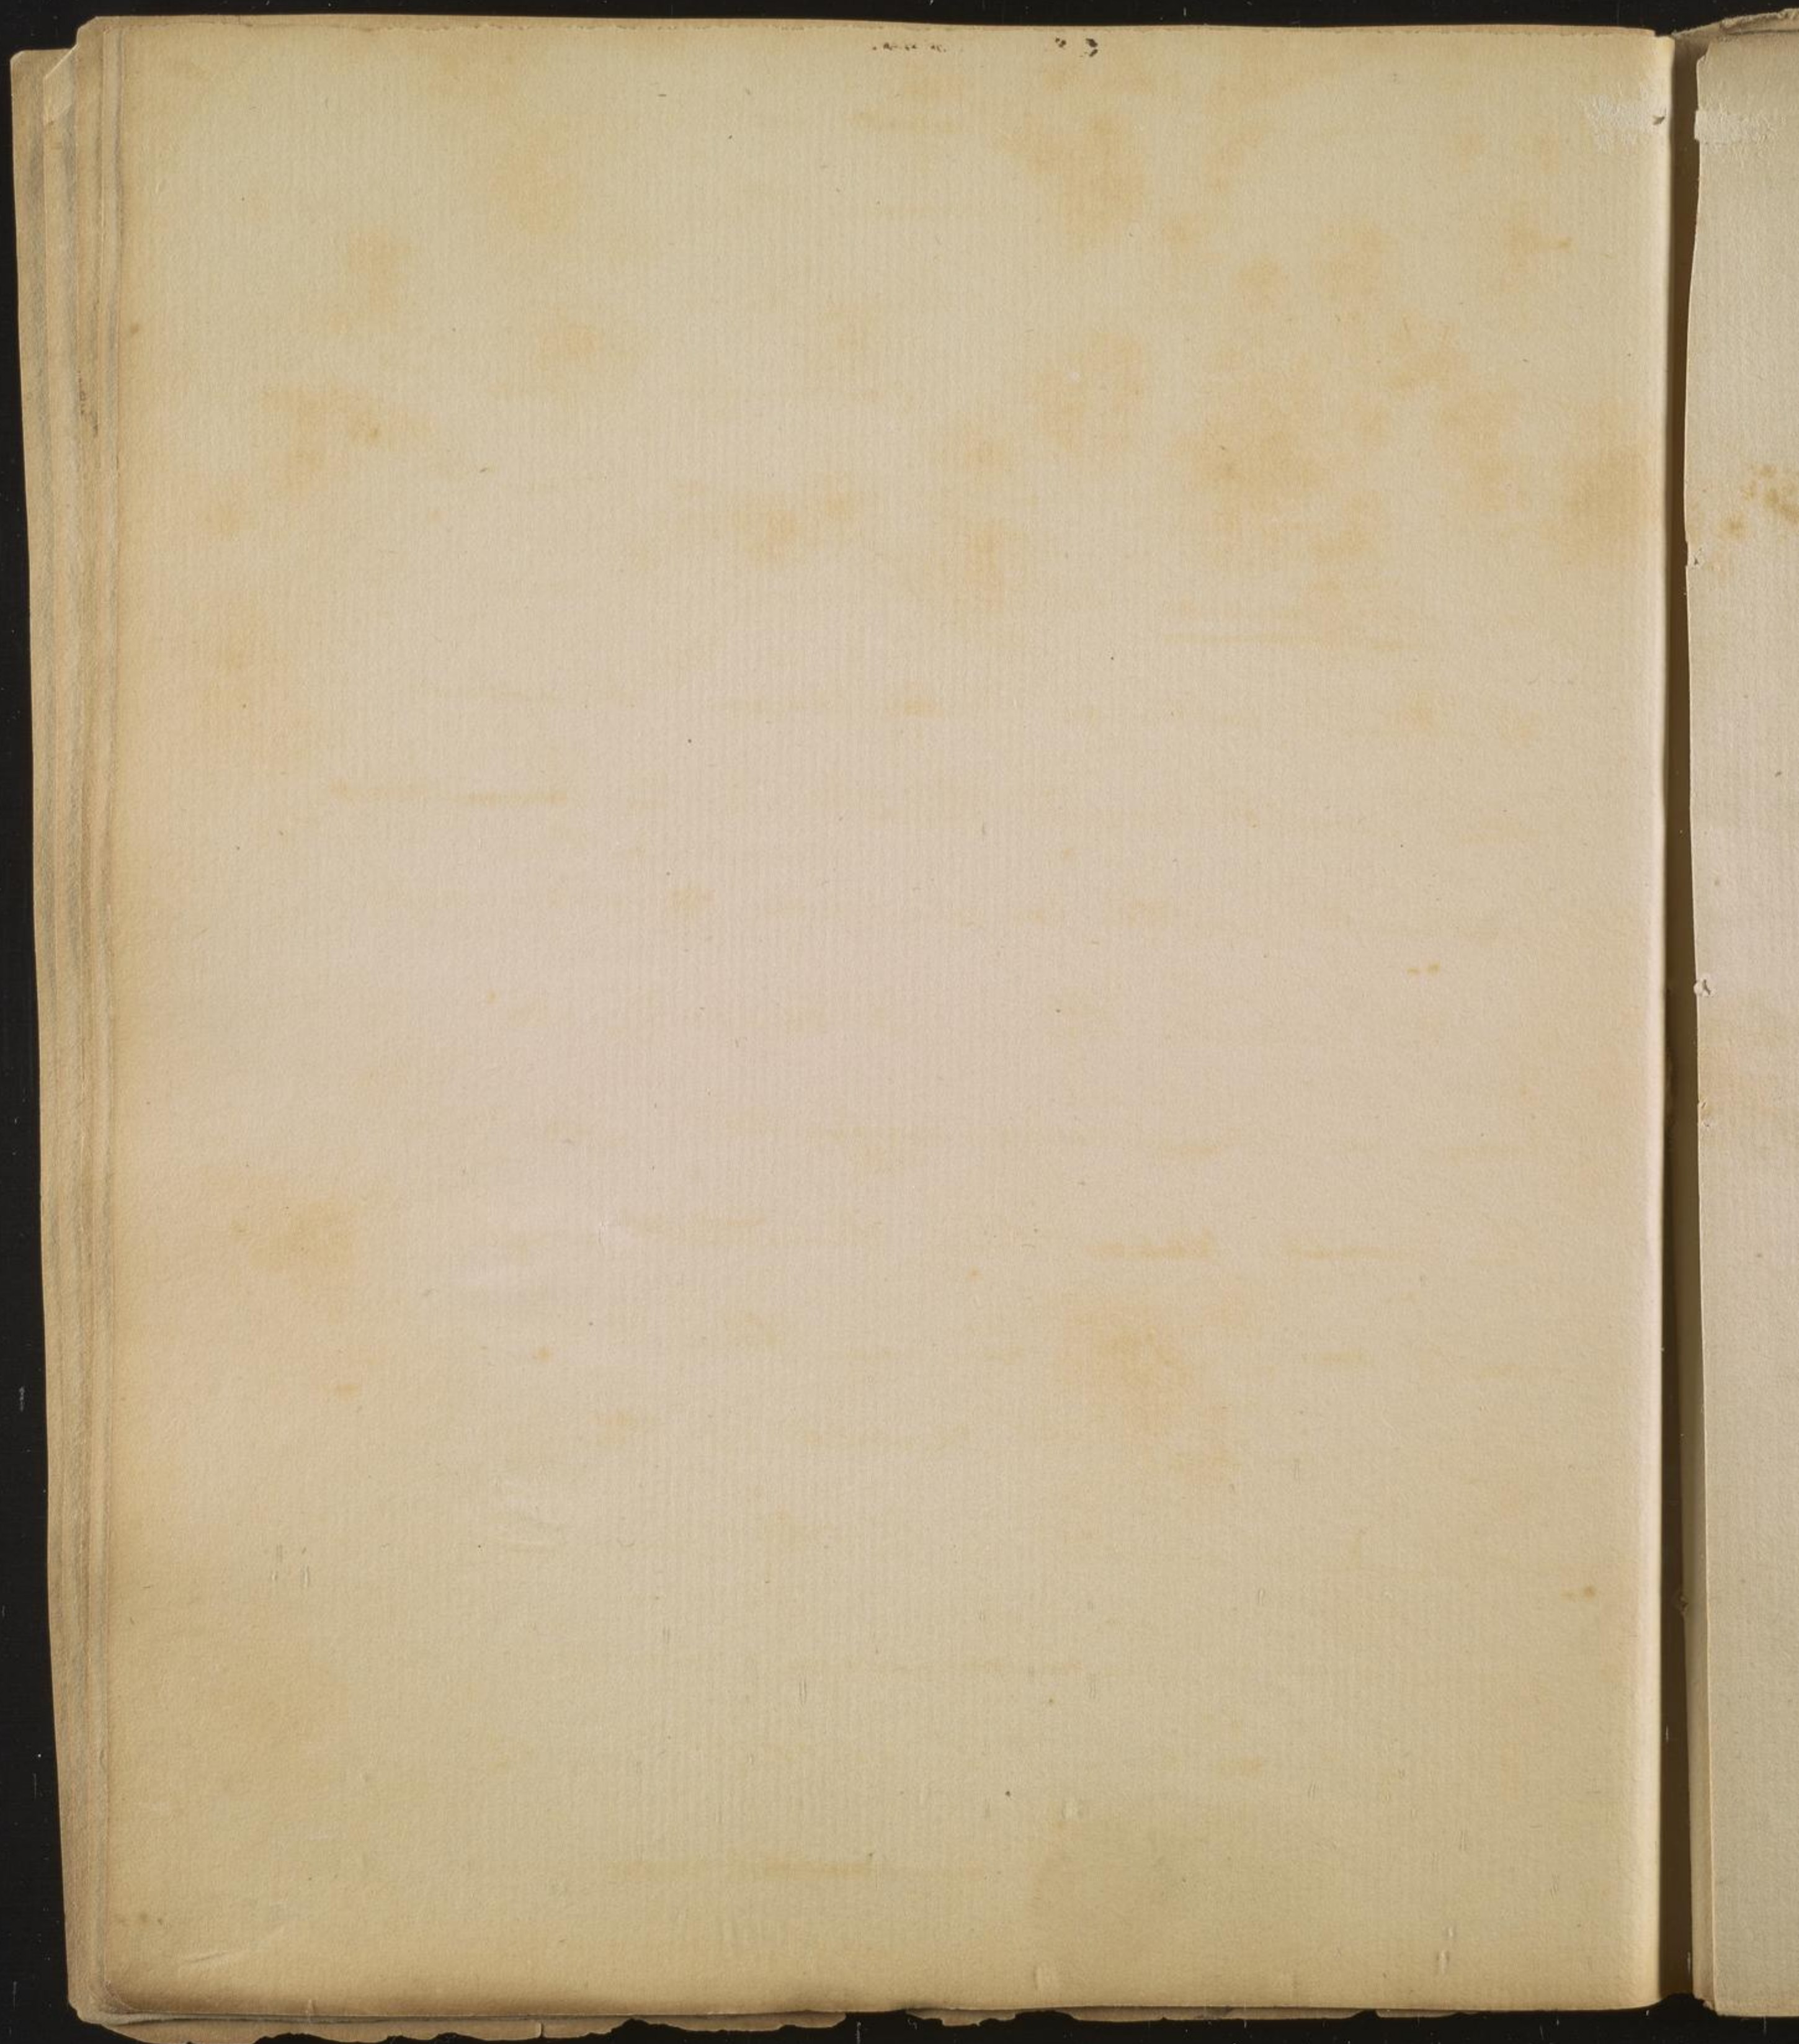

3 ~~675~~ <sup>new testament</sup>  
& many which is ~~not~~ set before us in the  
conduct of our business, they depart at the  
same time from their own happiness, and  
the true interests of society. <sup>as</sup> There is  
but one way of destroying vice, & that is  
by preserving it, <sup>so</sup> There is but One way  
of eradicating the ven. disease from  
the world, and that is by <sup>receiving</sup> ~~treating~~ ven.  
patients with so much <sup>treating them with so much</sup> tenderness & care,  
as to induce them to apply for relief as  
soon as they are infected. In no part of  
the world does this divine humanity pre-  
vail so much as in the City of London, &  
in no part of the world is the ven. disease  
attended with so little danger or incon-  
venience. In Louvain no person is admit-  
ted into <sup>the</sup> ven. hospital, without submit-  
ting to corporal ~~as well as~~ punishment  
accompanied, <sup>probably</sup> with ~~no~~ reproaches or contempt.

formerly 5  
+ The Ven Disease destroyed many sailors  
in the British navy, only because 15  
~~was~~ <sup>was</sup> deducted from their wages <sup>for the reason</sup> to pay for the  
cure of it. ~~If~~ This were not asked, they w<sup>d</sup>  
apply ~~the remedy~~ & thus the danger & mor-  
tality of the Disease be obviated. ~~But~~ <sup>But</sup> on the  
~~the~~ <sup>for</sup> the innocent often suffer alike with the

guilty by its envenoming so generally  
~~for~~ <sup>But</sup> ~~scourge~~ p. 88. Since this fine  
has been abolished, the sailors apply  
early for relief before the disease takes  
hold of the whole system, by which  
means death ~~was~~ & inability  
to do duty from the Ven Disease,  
are now scarcely known in the  
British Navy. —

4 516  
The consequence of this is, the ven. disease  
is no part of the world <sup>is</sup> attended with more  
danger & malignity, & more injurious +  
consequences to society than in ~~our~~ <sup>our</sup> air.  
But further + <sup>misery</sup>  
It is agreeable to trace the connection between  
Science and religion, — but is truly disturbing  
to perceive the lump of Science, advance so  
much faster than the standard of the  
Gospel, among civilized nations. — hence  
we find the principal objections that are  
made to ~~these~~ <sup>all</sup> proposals for bettering the  
condition of ~~our~~ <sup>all</sup> ~~men~~ of our fellow creatures  
as are miserable from vice, come from the  
Priests and Levites, or the former professors of  
Christianity. They did not learn to turn  
with disdain from this unfortunate ~~case~~  
part of our fellow creatures even from the  
example of the father of our religion,  
~~history of his~~ <sup>history of his</sup>, nor yet from the  
voice of heaven speaking in the human

+ a case of Gonorrhoea from Gout <sup>is mentioned</sup> by Dr. J. Clark in the 3<sup>rd</sup> Vol. of Phy & Lit. I say also one comm<sup>un</sup> to Dr. Jones by Mr. Pott - known according to Dr. J. Clark by filaments in the Urine, <sup>th</sup> when taken out are pellucid - & when dried turn to a Calx. Sauvage takes notice of it by the name of Gonor: podagrica in his first edition of his works. - +

Dr. Sherrin says he once saw a patient seized with Syphilis the day after an impure coition - the 3<sup>rd</sup> or 4<sup>th</sup> day a gonorrhoea came on. p. 271 Vol. 1.  
+ ~~5~~ from a suspension of the interm<sup>en</sup>.

⑤

The less nourishing Diet is, the more  
 laxative it is. It was remarked in Scotland  
 During the partial famine in 1796  
 that all <sup>old people & others</sup> ~~those persons~~ who were habitually  
 constipated, were relieved in consequence of  
 their eating coarse bread, or bread that  
 had not been bolted. The feculent parts  
 of the wheat form <sup>their</sup> ~~its~~ indigestible  
 nature distend, & stimulate the bowels,  
 and thus keeps them open. <sup>In the = the</sup> ~~the~~ <sup>aliments</sup>  
 more nourishing Aliments is, the more  
 it binds. This is witnessed in the hard  
 stools of Dogs - They owe this quality to  
~~the total abstraction~~ this food which  
 is animal yielding all its nutritious  
 qualities to the digestive powers of the  
 Stomach & the Absorbing powers of the  
 lacteals.

Use of laxatives Dr Bonet ~~the~~ forbids  
exhibiting such as are capable of being  
converted into nourishment upon an  
empty Stomach. These are not only waste  
Apples, but <sup>Cassia</sup> ~~Manna~~ - prunes - Inulphes.  
— When taken upon a Stomach some-  
what filled with Aliment, they operate  
more certainly and powerfully.

2 There have been many disputes concern-  
 -ing the origin of the Venereal Disease.  
 I believe it to be an ancient ~~venereal~~ Disease caused  
 with excess in the enjoyment of ven. pleasures,  
 - and that like the plague or yellow fever, it  
 is the product of all ages, nations & countries.  
 - By undue venereal intercourse, the Vagina  
 is often so inflamed as to secrete a matter  
 which is of so acid a nature, as to pro-  
 -duce disease in the male organs of generation,  
 which afterwards propagates itself. I think  
 I have known it to be thus induced in  
 newly married people. Humors in other  
 parts of the body when vitiated, often propa-  
 -gate themselves. We see it in the Jail fever,  
 and in <sup>several</sup> ~~various~~ diseases of the skin.

3 There have been many disputes <sup>whether</sup> ~~concerning~~  
 -ing the Lues, & Gonorrhoea be the offspring

*[Faint, illegible handwriting in cursive script, likely bleed-through from the reverse side of the page.]*

of  
a  
the  
le  
Dis  
ap  
he  
m  
co  
m  
ch  
o  
h  
v  
o  
o

of one, or <sup>of</sup> two causes. It is certain they  
affect different parts of the body, & that  
the ~~gonorr~~ matter of a gonorrhoea ~~cannot~~  
~~be~~ does not communicate the  
Disease, nor even inflame the Arm when  
applied to it by means of Inoculation. This  
has been proved by many experiments  
made by Dr Sanguet. But in <sup>opposition</sup> spite of those  
experiments, several facts & many analogies  
render it most probable, that they are  
different grades of the same Disease, and  
originate from the same cause. Who  
has not seen a neglected gonorrhoea end  
in a poy? and now & then a psoas  
out of the system in a gonorrhoea? & I  
mentioned formerly that a Cutaneous  
boon the Philad<sup>a</sup> frigate was the first

*[Faint, illegible handwriting in cursive script, likely bleed-through from the reverse side of the page.]*

*[Partial view of handwritten text from the adjacent page on the right.]*

sign of an Epidemic Dysentery - and yet  
 how unlike in their nature & how remote  
 in their seats, are a Catarrh & a Dysentery!  
 - The same virus which produces  
 a periodical head ach, - produces according to  
 circumstances ~~of putrefaction~~ a yellow fever.  
 The matter Ulcers secrete a different matter  
 according to their stages, or duration from  
 mild pus - to the matter of a Cancer. But  
 the most striking Analogy of the same  
 of the two diseases exists in the Vaccine  
 Disease; - matter taken before the 9<sup>th</sup> day  
 produces a ~~wild~~ <sup>on</sup> a single pustule <sup>on</sup>  
~~the arm~~ only - a kind of Gonorrhoea <sup>of</sup>  
 the arm - whereas the matter taken on  
 the subsequent days often produces fever  
 & covers the whole body with foul &  
 deep seated sores, <sup>a kind of</sup> which ~~do~~ <sup>of</sup> not protect

*[Faint, illegible handwritten text, likely bleed-through from the reverse side of the page.]*

*[Faint, illegible handwritten text on the right edge of the page, possibly from an adjacent page.]*

the system from the small pox - now  
who will deny the sameness of origin of  
the matter which produces these very dif-  
ferent and opposite effects?

4. The Gonorrhoea - has been divided  
into venereal, and venereal - or gonorrhoea  
originally acquired - and gonorrhoea from  
infection. They both depend on the same  
morbid action in the Urethra - and this  
action is the same with that which pro-  
duces a mucous discharge from other  
parts of the body. A Coryza - may be called  
a gonorrhoea from the nose - & the mucous  
discharge from the bronchi - a gonorrhoea from  
their mucous membrane. —

The gonorrhoea venerea arises from  
the following causes - in men.

- 1 Difficult Coition.
- 2 Intemperate Venery. Brooks.
- 3 ~~Excessive~~ <sup>Excessive</sup> Exercises. Birmingham - & in boys.

✓ I once knew it alternate with  
pulmonary consumption in a  
Capt Smith of this City; and once for  
15 years with the Gout.

4 Suspension of venereal intercourse, however  
In this case it is induced by the violence of a  
new impression. Men of 50 to 60 in whom  
the decay of the Ven<sup>e</sup> Appetite sometimes  
prompts them to seek for variety in order  
to resist it, are often affected with this  
disease without being infected by it.

5 From a suppurated intermitting fever. I  
mentioned formerly, its alternating with  
that disease in North Carolina. De la Haye.  
old age. 13 lines.

6 From debility ~~from all its cases~~  
of the From the Gout. Cases of it from this  
cause are related by several Authors - partic-  
ularly by Dr De la Haye in the 3<sup>rd</sup> vol. of  
the literary & physical essays & de la Haye.  
the latter calls it "Gonorrhoea podagrica"  
~~The latter calls it~~ I have known three in-  
stances of it in this city. The matter dis-  
charged De la Haye says appears in filaments  
which are pellucid, and when dried

V 11. a mild gonorrhoea often follows a  
virulent one.

turn to a Calf.

8 From Onanism. This is a frequent cause of it.

9 From Hard labor. For an air of Gonorrhea from this cause I shall read to you

an extract of a letter from my former

preceptor Dr Fisher - from N. England. <sup>from</sup> it is Hard Working. Perhaps only when first from <sup>infection</sup> it is

Gonorrhea is often confounded with

two other diseases. of the 1 a discharge from

the prostate gland. This is known by occur-

-ring in large quantities at a time, and

chiefly after ~~hard~~ going to stool. It is

often cured by inducing the discharge of the

passage by gentle purges.

2 With the Catarrh of the Bladder. This

Disease is occasioned by a preternatural se-

-cretion of the mucus of the latter and from

the bladder itself. It is discharged chiefly

with the Urine - and may be ~~renewed~~

*[Faint, illegible handwriting in cursive script, likely a letter or journal entry. The text is mostly obscured by fading and a large dark stain in the center.]*

*[Faint, illegible handwriting on the right edge of the page, possibly from the reverse side or an adjacent page.]*

seen in a large copy sediment afterwards.  
Its cure is - diluents - tonics &  $\frac{1}{2}$   
3 with an emission of seed. This is known  
by hardening when day - and by occurring  
chiefly in the night, and seldom without  
an eruption of the penis. I shall mention  
its cure hereafter. -

5 The Gonorrhoea Virulenta - or the Gonorr.  
when from infection is received in the following  
ways. 1 By impure Coitus. 2 by sleeping in an  
infected bed. <sup>In old case</sup> 3 wearing infected small cloaths.  
~~has~~ Maxwell's Case. 4 using infected privacy. -  
Rushburn - Ham. ~~the~~ The Lues is received  
not only in each of those ways, but by the  
matter coming in contact with a sore in any  
part of the body, especially the mouth - hence  
it is often received & imparted reciprocally  
by nurses & sucking children.

~~The disease~~ There is a great difference in

V It even passes by the lymphatics & mucous glands altogether in some instances, and appears only in aches & burning pains in the ligaments - joints and muscles. In these cases - it is called a dry pox. It might be called a supplicated pox. It is cured by inducing gonorrhoea - by ~~vt. purges & bloodlet~~. It was ~~thus~~ cured by nature in this way in the case related by Dr Thuring. Where nature does not thus cure it - vt purges & low diet, should be employed for that purpose.

the intervals between infection & the appearance of the disease from 3 days to 3 months. I have known only 28 <sup>Days</sup> ~~when it~~ take notice of this fact. I shall apply it presently.

The Lues affects the Lymphatic & Glandular system primarily & chiefly, but no part of the body is exempted from its ravages. The ligaments, skin - bones - <sup>eyes - nose -</sup> and even blood are affected by it, and it often passes from one of them to another. Dr. Sherry says he once saw it it appears in an - dialy after an impure connection in ~~the~~ <sup>a</sup> severe pain in the hip, which ~~is~~ passed of in a gonorrhoea in 3 or 4 days. That the blood is contaminated by the Ven <sup>er</sup> virus I infer from children that are born of infected parents bringing the disease into the world with them. I <sup>said</sup> ~~called it~~ formerly <sup>it was one of the forms of</sup> a congenial disease. <sup>V</sup>

In those cases in which the eyes & nose are early affected, I have ~~not~~ suspected,

✓ It has been ~~corrected~~

to  
as  
the  
or  
pe  
c

the infection is communicated by patients  
~~after handling~~ handling their eyes & thrusting  
 their fingers up their noses, after accidentally  
 or designedly touching their linen, <sup>when wetted with matter</sup> or the glans  
 penis. — But there can be no doubt of the  
 eyes being affected by sympathy with the  
 Urethra. We see disease but on every part  
 of the system by Strictures in the Urethra.  
 Why not an inflamm<sup>n</sup> of the eyes by the  
 irritation of the ven: virus upon it? &

For the Cure of Gonorrhoea —

Local Remedies are often sufficient —  
 These are Injections of sweet oil — Cataplasms  
 of Gum Arab & water & a weak solution of  
 Linn: Sublimate — Inflamm<sup>n</sup> of the penis  
 whether in Phg: or Paraphyma should  
 be treated with purges — low diet — lead  
 water to the part & poultices to the part

V a blister to the perineum, & the  
Tinct: of Canth from 10 to 20 Drops  
three times a Day have been found  
useful after all other remedies have  
failed.

affected, and - if all fail - bloodletting by  
 leeches. Corda by binding the penis down  
 by cramping and leeches. <sup>Backwards.</sup>  
 a Bulb should always be left to open  
 itself if not disengaged by those remedies.

The ~~the~~ Gleet which succeeds a gonorrhoea  
 virulenta is often an obstinate disease.

- Injections of Chast wood or portwine  
 & water - Infus: of Bark - or Tannin  
 are proper to begin with - if they fail  
 try - a weak solut: of white Vit: or Sac:  
 Saturn: - If they fail - try the following  
 Quack medicine - I call it so because a

Quack medicine takes place of ~~the~~ part  
 of its ingredients. It is taken 9<sup>th</sup>

Con. Lib. 9<sup>th</sup>; 4pt CC 9<sup>th</sup> XX 4pt 3iv  
 bis die. It was the great cure for the  
 Gleet in a noted Quack in Carolina.

Sometimes a Gleet is kept up.

✓ I have known one instance <sup>ch</sup> ~~in~~  
and read of another <sup>in</sup> [David on motion &  
rest] in which a gonorrhoea was  
completely cured by a fever - in the former  
case the fever ~~lasted~~ lasted above 20 - in the latter forty  
Days. —

by Ulcers in the Urethra. This heat may easily be felt. a 9<sup>th</sup> of Cal: every night

Often cures them aided by mild mercurial injections. This glut is generally cured by matrimony. ~~Does not know it~~

Strictures are to be cured by Bougies. They are improved Dr. Han says when they are covered with tobacco leaves. ✓

In ~~the~~ the Cure of the Lues <sup>Three</sup>

Mercury has been supposed to act in <sup>two</sup> ways - 1 By inducing a new & counter action. 2 as an excrement, & 3 as a specific, that is destroying the Venereal Virus by entering into mixture with it. Dr. Louque has proved that it acts in the latter way by many experiments. He mixed the matter from Ven: Sores with all the common preparations of  $\text{Hg}$  and then

made punctures <sup>the 17.</sup> w<sup>h</sup> a lancet dipped in it  
into the arms of a number of his friends.  
In no one of them did the least inflam-  
-mation, or infection follow the operation.

It is possible  $\zeta$  salivates by a sympathetic  
action on the salivary glands, but we have  
many proofs of its entering the circulation.  
It has been found even in the bones of  
persons who work in the quicksilver  
mines of Spain. Dr Thury.

Admit what theory we please of  
the manner of  $\zeta$  operating, or of the functions  
of the skin, we must admit - that  $\zeta$   
when applied to the skin produces ~~all its~~  
many of its salutary effects upon the  
body. A Dr Lopez a Spanish physician

V Where great pains in the bone take  
place, <sup>general or</sup> local bleeding should be used  
according to their degree. These pains are  
the effects of Stimulus in common w:  
~~Other~~ pains in the bones from other  
causes, and not of ~~the~~ the Corrosion  
of the bones by Ven Matter. The Distur:  
-tion of the bone, and of other parts is the  
effect of previous inflamm<sup>n</sup>. - It is suppur:  
-tion, or a series of gangrene. - I have  
thus often relieved Ven Pains in our  
hospital. - we treat Burns, & inflamm<sup>n</sup> of  
the penis in the same way.

informed Dr. Sherry that the more ex-  
-tensively mercurial ointment was  
applied to the surface of the body - the less  
apt. disposed it was to salivate. I be-  
-lieve it - and perhaps I might add the  
more limited & concentrated the spot is,  
to which we apply the  $\gamma$  ointment, the  
sooner it salivates - hence the facility <sup>the</sup>  
and speed <sup>to</sup> which it produces that effect  
when applied under the arms. —

The Ven. Disease ~~like all other diseases~~  
has been chained by association w<sup>th</sup>  $\gamma$  but  
there are cases which forbid its use, ~~as~~  
~~render it unsafe~~ These are, ~~a~~ full and  
plethoric habit ~~and~~ & a debilitated and  
irritable habits. Depletion should prepare  
the way for  $\gamma$  in the former, & Back

*[Faint, illegible handwriting in cursive script, likely bleed-through from the reverse side of the page.]*

*[Faint, illegible handwriting on the adjacent page, visible on the right edge.]*

and other Cordials - <sup>19</sup> in the latter state of  
the system. In short - the pulse - should  
regulate our prescriptions in this, as in  
all other general diseases. —

Opium and the Nitric Acid were popular  
remedies a few years ago for the cure  
of hives. At present they are of no repute.  
I never gave them. It is here common  
with my brethren to charge me with a  
fondness for novelties - ~~in medicine~~ - and with  
introducing new medicines into practice. I  
deny the charge. On the contrary all ~~the~~  
my remedies are old ones. ~~I have only~~ <sup>only instead</sup>  
~~aimed to introduce~~ of adding to this number.  
I have aimed at reducing them to a few.  
I enumerate a dozen medicines that have been  
popular, and are now laid aside in

✓ where  $\bar{y}$  will not salivate - Dr Tho<sup>o</sup>  
Clark directs us (after first ~~for~~ changing  
the system with it) to leave off giving it,  
then suddenly <sup>to</sup> give a large dose of it.  
By giving 12 grs of Calomel <sup>with opium</sup> in  
this way he says he once excited a  
salivation in one day. —  
Lorss said to be

Veneral ~~sores~~ are sometimes of a local  
nature in which case they resist the  
internal use of  $\bar{y}$  <sup>But there are not venereal.</sup> for years. They are  
to be cured only by <sup>which destroy them.</sup> local remedies; I  
have cured one on the penis <sup>ch</sup> had  
distressed a patient for six years, by  
Arsenic, another in the throat by  
Lorss: Sublimata.

we see the same thing in the cuticular  
small pox & vaccine disease in <sup>the matter of</sup> the skin  
is affected with a sore, which is not commu-  
-nicated to the whole system. —

I spoke formerly of the ~~venereal~~

It is by ~~the former~~ <sup>a new</sup> combination of old medicines, and by giving them at different times, and different doses from what were practised formerly that I have endeavoured to add to their efficacy in the cure of diseases.

I have met with a case of Lues in w<sup>ch</sup> in six successive trials the ♀ produced Inf<sup>l</sup> in the Genitals - Anno & even fell down. It was cured afterwards by the Decoction of the Woods & other evacuating remedies. V

The Lues is sometimes combined with the Uter - <sup>Rheumatism</sup> Lues & Gout - in w<sup>ch</sup> cases the remedies for each of those diseases sh<sup>d</sup> be given. & will seldom be proper in the Lues until its worst symptoms are subdued. When pains distinguish from Rheumatism by coming at night. Lastly the Lues is sometimes counterfeited by the Hippocriticism, Gout & Rheumatism. Happily the remedies for each of them are

Diseases sometimes induced by injury  
and of thin Air. —

the same. It is often induced by cold taken during  
 the use of mercury  
 Lastly the Lues sometimes counterfeited by  
 the Hippocordiasm. It is a most distressing  
 form of that disease - for it is often combined  
 with a sense of guilt, as well as of ~~the~~ the  
 fear of a miserable and disgraceful death.  
~~It may be known~~ The mind here produces ac-  
 -al pain - and in those parts too in which  
 venereal pains usually occur as the ~~skin~~ skin,  
 nose and throat. Tho' ~~the~~ <sup>the</sup> Lues; ~~the~~ <sup>the</sup> Lues. It may  
 be distinguished from the Ven<sup>e</sup> disease. 1 by the  
 its remoteness from the time of infection. If above  
 3 months - always to be doubted, <sup>unless it be local.</sup> it is true it  
 sometimes breaks out much later. When it  
 appears - years afterwards I believe it is always  
 the effect of Gout - for the same disposition ~~of~~  
 the prompts to the acquisition of <sup>of the venereal</sup> ~~both diseases~~  
<sup>that is</sup> ~~the love of pleasure~~ the love of plea-  
 -sure, prompts to intemperance in drinking

235  
Immediately after an impure sexual  
connection. It was probably to prevent  
this disease, as well as the leprosy, that  
circumcision was first instituted. It was  
it is true a religious ceremony among the  
Jews - so were their frequent Abstinences,  
and yet these we know were intended pri-  
marily to prevent diseases of the skin,  
and perhaps fevers. It is said further to  
blunt the appetite for Ven. Pleasures by ap-  
proaching the possibility of the glands penis being  
its constant exposure <sup>to the air or by its</sup> friction ~~on~~ with  
the <sup>cloathing</sup> ~~covering~~ which surrounds it. ~~There~~ <sup>They</sup> are  
two tribes of Indians on the waters of the  
Mississippi called the ~~Shanese~~ <sup>Shanese</sup> & <sup>Shanese</sup> ~~Shanese~~ <sup>Shanese</sup> who  
cannot draw the prepucial bag, or who  
labour under a constant & congenial phy-  
sical morbid. This is so universal that they con-  
sider a man disgraced who <sup>has</sup> ~~has~~ <sup>not</sup> ~~not~~ it

which is the most common cause of  
 Font. Dr Jones; case of 10 years standing in  
 a Lie Captain - 2 The Absence of Ulcers.  
 3 a Hypochondriac or nervous <sup>disposition</sup> ~~temperament~~  
 either hereditary - Congenial, or ~~hereditary~~ <sup>acquired</sup>.  
 I have often met with this disease, ~~and~~  
 as often cured it - by reason - ridicule &  
~~strong delusions~~ and by advising matric-  
 -mony. It is called in England the Noddy  
 pox. —

It has been remarked that the Jews are  
 less liable to this disease, than men of other  
 religious denominations. The <sup>cutting</sup> ~~excision~~ of the  
 prepuce by circumcision in early life  
 prevents the holds of the Virus upon  
 the penis <sup>as</sup> we know to be often between  
 the prepuce & the penis. It is I have  
 heard, prevented by washing that part &

24  
I call him Pochequa<sup>24</sup> - that is a whiteman,  
for they know ~~the~~ that state of the penis  
does not exist naturally among whitemen  
of our country. It is possible the same  
preternatural state of the penis may  
have existed among the Iroquois; - If so -  
we have another, and a very strong  
reason for the institution of circumcision  
in a country where the lypsoy certainly,  
& the Ven<sup>l</sup> Disease probably were common  
Diseases. —
